

### Videojet® PrintPro Digital Imaging System

#### High Speed, High Quality Imaging When the Need for Speed and Flexibility are Your Main Issues

The Videojet PrintPro™ system produces high quality digital images using variable text and graphics. This versatile binary array printer can be combined with Cheshire® transport bases for a stand alone operation, or placed in-line as part of an existing production process.

- **Flexible Configurations** – the Windows® NT-based application software makes job set up flexible and intuitive
- **Fast Drying Inks** – adhere to a wide variety of surfaces without the need for dryers; more throughput at lower operating costs
- **Imaging Speeds** – up to 967 ft./min. (290 m/min.) assure high production rates
- **TrueType® Fonts** – allow each user to customize their images

**Videojet PrintPro™ System**

### Videojet® VIP-NT Control System

#### Modular System that Grows with Your Operations

The Videojet VIP™-NT control system is designed to let you control all facets of your production operation from virtually any workstation worldwide.

- **Control any Type of Post-Press Operation** – saddle stitchers, mail tables, wrappers, stackers, perfect binders, inserters and co-mailing lines
- **Instant Two-Way Data Transfer** – download data and job scheduling functions in seconds with real-time production measurements and monitoring
- **Job Management and Changes** – file drag and drop capability allows for simple job assignments from a single, unified screen

### Videojet Fluids

Videojet formulates, manufactures and delivers over 300 application unique ink and fluids products. Videojet fluids are specifically designed to ensure and enhance your Videojet® and Cheshire® digital imaging systems as well as increase your production efficiency. Videojet is the only solution provider you need.

### Videojet PrintMail™ and PrintMail WideArray Systems

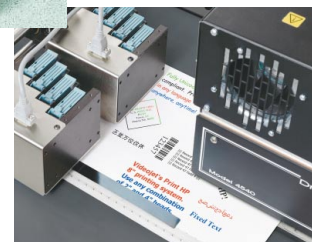

#### Affordable, High Quality Ink Jet Addressing

The Videojet PrintMail and PrintMail WideArray Systems are the affordable solution to ink jet imaging and addressing on a myriad of media types and configurations.

- **Sharp Imaging Quality** – images can be individual lines of text or blocks of information up to eight inches (20 cm) high with WideArray version
- **Integrates with Variety of Equipment** – mail tables, feeder bases, Cheshire® TLS system, conveyors, and dryers, including competitive models
- **Modular Flexibility** – accommodates current and future printing needs
- **Incredibly Easy to Use** – graphical user interface simplifies setup and operation
- **Superior Job Layout Features** – include built-in barcodes, record block message line, indicia bitmap or conditional bitmap

**Videojet PrintMail™ WideArray System**

**Cheshire  
TLS™ System**

### Cheshire® TLS System

**Tab, Label and Stamp with Incredible Speed, Accuracy and Ease**

The Cheshire TLS™ system provides production rates in excess of 30,000 pieces per hour. It can also be used in-line with most friction feeders, feeder bases and mail tables.

- **Apply Postage Accurately** – self adhesive rolls with 3" (7.6x10 cm) core
- **Label Variety** – apply label sizes of 3/4" (1.9 cm) width minimum to 2" (5.1 cm) width maximum
- **Speeds** – transport belt: 0 to 600 ft/min. (182 m/min.); tabbing head: 0 to 375 ft/min. (114 m/min.)
- **Accuracy** – tab placement +/- 1/8" (3 mm) with repeatability

### Videojet® e-commerce

Today, US customers enjoy the speed and convenience of the Videojet e-commerce system. You have access to order over 8,000 **InkSource** fluids, parts, and accessories–24/7. You can also check your purchasing and payment information online, with the ability to obtain pending shipment information.

**Order online at  
www.videojet.com**

**Click. Buy. Done.™**

### Cheshire® 4000 Imaging System

**Versatile and Easy Ink Jet Imaging**

The Cheshire 4000 Imaging System uses an industrial PC-based controller to give commands to one to four Videojet Excel 270g dual head imagers. The Cheshire 4000 system can operate at medium to high speeds.

- **Six Lines of Fixed or Variable Text**
- **Simple 4 Screen Menu**
- **SurePrint® Software** – controls ink viscosity automatically
- **Easy Data Input** – accepts floppy and hard disks, or direct network input

**Cheshire®  
System 4000**

### Videojet® TotalSource Services

Our **TotalSource** services are the finest and most complete technical support system in the business. The services include expert applications assistance, operator training, and a full spectrum of maintenance services. Customer support where and when you need it, 24/7.

### Cheshire® Model 7050 Ink Jet Base

**Fast and Accurate Media Processing**

The Cheshire 7050 ink jet base interfaces with a variety of printers and includes independent feeder speed and transport controls as well as automatic space control.

- **Vibration-Free Design** – minimizes vibration to ensure accurate media placement
- **High Performance Feeder Option** – can run a variety of media at 100,000 pieces per hour
- **Heat Resistant Option** – permits printing with water-based inks at high speeds

**Cheshire® Model 7050  
Ink Jet Base**
